(ESL) English as a Second Language Programs Basic Survival English

A 4-week, 12-hour course designed for the rote beginner. You will learn the way the English language works, the alphabet, important phrases and vocabulary for basic communication, numbers, and greetings and how to form questions and commands (\$180).

International Communication for Professionals

A 10-week, 30-hour course for professionals who already have some command of the English language. The concentration is on socializing, traveling, business, culture, and food and drink. Topics covered include such points as giving/getting directions and instructions, participating in meetings, making phone calls, staying in hotels, making introductions, etc. The topics are combined with grammatical practices/exercises and specialized vocabulary. (\$450).

English for Special Purposes

This course offers your employees the flexibility to study for whatever length of time you need and in whatever field they need to learn English. Some examples of fields of study are the construction industry, computer science, banking and finance, aviation, the medical field, and the hospitality industry. Corporate rates available. Call for pricing.
